General Approach :

- Helping students read and comprehend medical and academic lexicon and idiomatic expressions used in the medical field. S/he should also be able to speak and understand medical English addressed toward him or her. Reading and understanding original English texts is of utmost importance to the students

Module approaches:

- To learn to accomplish an active and fast reading of relevant general or medical texts and resources.
- The students should be able to: read discriminatingly (selective reading: the skills required to focus in on the important information and to skim through the nonimportant information).
- To develop listening skills in order to being able to communicate in academic situations.
- To collaborate effectively within and across peer groups using speaking skills.

- To gain ability to give oral presentation in a general or special medical topics.

Required References:

- English for the students of Medicine (book 2), SAMT publication, Reza Deedari, 2019

Teaching method:

- Interactive teaching, Lecturing, Question and answers, Seminar

Student's duty:

- Presenting this course mainly based on Questioning and answering in each session.
- students should be active participate in Class (listening , reading and speaking)
- All assignments must be handled by the due date; otherwise, the student will receive no credit.

Scoring criteria:

- Active participating in class 10%
- Reading the recommended texts and doing assignments 20%
- Giving an oral presentation of any favorite topic (Voluntary) 10%
- Final exam or project 70%

The policy on dealing with student absence and lateness in the classroom:

- The approvals of the educational regulations will be taken into account.

The timetable for presenting the general language curriculum in the first semester in 2024
